INDEPENDENT AUDITORS' REPORT

To the Shareholders and the Board of Directors of Joint Stock Company "Galt and Taggart":

Opinion

We have audited the separate financial statements of JSC "Galt and Taggart" („the Company“) which comprise the statement of financial position as at December 31, 2024 and the statement of comprehensive income, statement of cash flows and statement of changes in equity for the period then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects the financial position of the Company as at December 31, 2024, and of its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards (IFRS).

Basis for our opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditors' Responsibilities for the Audit of the Standalone Financial Statements section of our report. We are independent in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the financial statements in Georgia; and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for the other information. The other information comprises the information included in the Management Report. Management reproti is expected to be made available to us after the date of this auditor's report.

Our opinion on the financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. When we review the 2024 management report, if we determine that there is a material misstatement, we are responsible for informing those charged with governance. It is also our obligation to express an opinion on the compliance of the parts of the company's 2024 governance report "On Accounting, Reporting and Auditing" with the Law of Georgia ("the Law") and in case of essential inaccuracies, to indicate their essence. Also, to declare in case of non-presentation of any information specified by law in the management Report.

Responsibilities of management and those charged with governance for the financial statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with International Financial Reporting Standards (IFRS), and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error. In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditors' responsibility for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- ▶ Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- ▶ Evaluate the overall presentation, structure and content of the financial statement, including the disclosures, and whether the financial statement represents the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

1. PRINCIPAL ACTIVITY

a) The company and its activities

JSC Galt and Taggart (the “Company”) was established on 19 December 1995 under the laws of Georgia. The Company operates under a brokerage license issued by the National Bank of Georgia (“NBG”; the Central Bank of Georgia) on 10 September 2014. During the years 2000-2009 the Company operated as “Galt and Taggart Securities”, during 2009-2014 operated as “BG Capital”. And since 26 August 2014, the Company operates under the name – JSC “Galt and Taggart” (identification number - 211359206). The Company is fully owned subsidiary of JSC “BG Financial” as at 31 December 2024 and 2023, the Company’s ultimate parent (100%) is “Lion Finance Group PLC” which is registered on the London Stock Exchange. Galt & Taggart is a leading investment bank and brokerage company in the Georgian market. The company offers clients all types of investment banking services, such as brokerage, research and consulting services, investment banking services, asset and property management. The Galt & Taggart team consists of more than 50 professionals.

The company is the parent company of the following subsidiary registered abroad:

Subsidiary company	Percentage of voting rights and ordinary capital held		Country of establishment	Registration date
	December 31 2024	December 31 2023		
Galt and Taggart Holding Limited	99.23%	99.23%	Republic of Cyprus	July 3 2006

The Company’s registered legal address is 3 Aleksandr Pushkin St, Tbilisi, 0102, Georgia.

b) Operating environment

The company mainly operates in Georgia. A developing economy like Georgia is rapidly changing and vulnerable to global market conditions and economic downturns. As a result, operations in Georgia may involve risks are not typically associated with those in developed markets. Nevertheless, over the past few years, the Georgian government has initiated civil, criminal, tax administrative, and commercial reforms, which have positively impacted the country's investment climate in general.

2. BASIS OF PREPARATION

a) GENERAL

These separate financial statements (the “Financial Statements”) are prepared in accordance with International Financial Reporting Standards (“IFRS”).

The preparation of financial statements under IFRS requires certain estimates and assumptions to be made. It also requires the company's management to use judgment to adopt and implement the most appropriate accounting policies. Significant accounting estimates and assumptions used in the preparation of the separate financial statements are set out in Note 4 to the separate financial statements.

The main principles of accounting policies used in the preparation of individual financial statements are given in Note 3 of the individual financial statements. The application of accounting policies is carried out continuously for all years unless otherwise indicated.

New or Changed Accounting Standards and Interpretations

The Company has implemented and taken into account all new and amended accounting standards and interpretations issued by IASB that were mandatory in the current reporting period.

New or amended accounting standards and interpretations Early adoption

The Company has not early implemented and assessed the impact of those standards and interpretations that have been issued but are not yet effective during the reporting period ending December 31, 2024.

b) INVESTMENTS IN SUBSIDIARIES AND ASSOCIATES

The company records an investment in a subsidiary at the cost of that investment until the investment is derecognised or impaired in its separate financial statements. The carrying amount of investments in subsidiaries is reviewed at each reporting date to determine whether there is any indication of impairment. If such an indicator exists, the asset's recoverable amounts are determined. An impairment loss is recognised when the carrying amount of the investment in the subsidiary exceeds the recoverable amount. An impairment loss is recognised in profit or loss.

Associates are entities in which the Company generally has between 20% and 50% of the voting rights, or is otherwise able to exercise significant influence, but which it does not control or jointly control. As the Company does not prepare consolidated financial statements investments in associates are not accounted under equity method and are recognised at acquisition cost less impairment losses. The presented financial statements associated are not accounted in accordance equity method and is accounted at cost, because the company meets all the conditions listed below in accordance with IFRS 10, "Consolidated Financial Statements.":

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

- Company is a wholly-owned subsidiary of another entity;
- The entity's debt or equity instruments are not traded in a public market
- The entity did not file, nor is it in the process of filing, its financial statements with a securities commission or other regulatory organisation, for the purpose of issuing any class of instruments in a public market; and
- The ultimate parent of the entity produces financial statements available for public use that comply with IFRSs, in which subsidiaries are consolidated.

3. SUMMARY OF SELECTED SIGNIFICANT ACCOUNTING POLICIES

Principal accounting policies applied in the preparation of these separate financial statements are set out below. These policies have been consistently applied to all the periods presented, unless otherwise stated.

FUNCTIONAL AND PRESENTATION CURRENCY

The Company's functional currency is the Georgian Lari ("GEL"). The presentational currency of the Company's financial statements is the Georgian Lari. Operations in foreign currency are initially recorded in the functional currency at the rate determined by the National Bank of Georgia for the day of the operation. As of the date of the financial statement, the monetary assets in foreign currency are converted into functional currency at the exchange rate established by the National Bank of Georgia at the end of the year. All exchange rate differences arising during settlement are reflected in the profit and loss statement.

Transactions and balances

Monetary assets and liabilities are converted into the functional currency of each enterprise at the end of the relevant reporting period at the exchange rate of the National Bank of Georgia ("NBG"). Foreign currency gains and losses arising from settlement transactions and year-end monetary assets and liabilities denominated in each entity's functional currency are recognised in profit and loss for the year. Foreign exchange gains and losses related to borrowed funds and cash and cash equivalents are recognised in the statement of profit and loss and in other comprehensive income under "finance income or expenses". All other foreign exchange gains and losses are reflected in the statement of profit and loss and in other comprehensive income, "Other income/(expense), net". Conversion at the exchange rate at the end of the year does not apply to non-monetary items, which are evaluated at their original cost. Non-monetary items valued in foreign currency, including equity investments, are recalculated at the exchange rate prevailing on the date of determination of fair value. The effect of changes in exchange rates on non-monetary items measured at fair value in a foreign currency is recorded as part of the fair value gain or loss.

As of December 31 2024, the main exchange rates established by the National Bank of Georgia used for the conversion of foreign currency balances were as follows: USD 1 = GEL 2.8068, EUR 1 = GEL 2.9306, British Pound Sterling GBP 1 = GEL 3.5349 and Swiss Frank CHF 1 = 3.31118

As of December 31 2023, the main exchange rates established by the National Bank of Georgia used for the conversion of foreign currency balances were as follows: USD 1 = GEL 2.6894, EUR 1 = GEL 2.9753, British Pound Sterling GBP 1 = GEL 3.4228 and Swiss Frank CHF 1 = 3.3772

As of December 31 2022, the main exchange rates established by the National Bank of Georgia used for the conversion of foreign currency balances were as follows: USD 1 = GEL 2.7020, EUR 1 = GEL 2.8844, British Pound Sterling GBP 1 = GEL 3.2581 and Swiss Frank CHF 1 = 2.9322

REVENUE RECOGNITION

The company recognises a provision for the transfer of promised goods or services to customers in the amount of consideration that it expects to be entitled to receive in exchange for the transfer of those goods. The company uses a five-step model for all customer contracts:

- Identifying the contract
- Satisfaction of performance obligations
- Determining the transaction price
- Allocating the transaction price to performance obligations
- Revenue recognised, when (or if) a person fulfills a contractual obligation.

The company recognise revenue when (or as) the entity satisfies a performance obligation by transferring a promised good or service (ie an asset) to a customer. An asset is transferred when (or as) the customer obtains control of that asset.

Enforceable obligation and revenue recognition over time

The main part of the company's revenue is the commission for the provision of services for trading shares on behalf of clients on the trading platform and the commission from the placement of bonds. *Revenue from brokerage activity* The company offers its clients services related to securities trading on the international brokerage platform. The service is provided at a specific moment in time during the transaction requested by the client (purchase of shares, sale, transfer of funds, etc.).

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

Revenue from placement of bonds The company offers its clients bond issuance, purchase, circulation, and delivery services. The company recognises revenue from the placement of bonds at the moment of transfer to the purchaser of the bonds. *Determining of contract costs*

The company's revenue from the bonds represents a percentage of its placement value as determined by the contract, and the revenue from each placement is calculated at the specified rate. The annual cost of the Bond Escrow Agent service is a fixed amount for all clients. Trading fees on a brokerage platform differ by financial instrument and trading exchange. Allocation of value between the obligations to be performed The company's contracts have fixed prices. The contract specifies the corresponding fee for each obligation.

EXPENSES

Expenses are recognised in the statement of comprehensive income if there is a decrease in future economic benefits associated with a decrease in an asset or an increase in a liability that can be reliably determined.

Expenditures are recognised in the statement of profit and loss as incurred if economic benefits from the expenses are no longer expected in the future or if the future economic benefits no longer meet the criteria for recognition as an asset in the balance sheet.

EMPLOYEE BENEFITS

Wages, salaries, paid annual leave and sick leave, bonuses, and non-monetary benefits are accrued in the year in which the associated services are rendered by the employees of the company. The Company has no legal or constructive obligation to make pension or similar benefit payments beyond the payments to the statutory defined contribution scheme.

INCOME TAX

Income taxes have been provided for in these financial statements in accordance with legislation enacted or substantively enacted by the end of the reporting period.

On 13 May 2016 the Government of Georgia enacted the changes in the Tax Code of Georgia whereby companies (other than banks, credit unions, insurance companies, microfinance organizations and pawn shops) do not have to pay income tax on their profit earned since 1 January 2017, until that profit is distributed or deemed distributed in a form of dividend.

The income tax at 15% is payable on gross up value (i.e., net dividends shall be grossed up by withholding tax 5%, if applicable, and divided by 0.85) at the moment of the dividend payment to individuals or to non-resident legal entities. Dividends paid to resident legal entities from the profits earned since 1 January 2017 are tax exempted.

Income tax arising from distribution of dividends is accounted for as an income tax expense in the period in which dividends are declared, regardless of the actual payment date or the period for which the dividends are paid

In addition to the distribution of dividends, the tax is still payable on expenses or other payments incurred not related to economic activities, free delivery of assets or services and representation costs that exceed the maximum amount determined by the Tax Code of Georgia. All advances paid to entities registered in jurisdictions having preferential tax regime and other certain transactions with such entities as well as loans granted to individuals or non-residents are immediately taxable. Such taxes along with other taxes, net of tax credits claimed on assets or services received in exchange for the advances paid to entities registered in jurisdictions having preferential tax regime or recovery of loans granted to individuals or non-residents, are recorded under Taxes other than on income within operating expenses.

TAXES OTHER THAN INCOME TAX

Taxes other than income tax are recognised in the reporting period in which the binding event occurs. A mandatory event is an action or a fact that, according to the Tax Code of Georgia, determines the payment of tax. Prepaid taxes, from which future economic benefits are expected to flow, are recognised as assets.

PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment are stated at cost, less accumulated depreciation and impairment, where required.

At the end of each reporting period Management assesses whether there is any indication of impairment of property, plant and equipment. If any such indication exists, Management estimates the recoverable amount, which is determined as the higher of an asset's fair value less costs of disposal and its value in use. The carrying amount is reduced to the recoverable amount and the impairment loss is recognised in profit or loss for the year. An impairment loss recognised for an asset in prior years is reversed where appropriate if there has been a change in the estimates used to determine the asset's value in use or fair value less costs of disposal. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognised in profit or loss for the year within other income or expenses.

Land, CIP and uninstalled equipment are not depreciated. Depreciation on other items of property, plant and equipment is calculated using the straight-line method to allocate their cost to their residual values over their estimated useful lives:

	Useful life (Year)
Computers and equipment	5
Furniture and other inventory	5

The useful life of leasehold improvements is determined by the term of the lease.

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

The residual value of an asset is the estimated amount that the Company would currently obtain from the disposal of the asset less the estimated costs of disposal, if the asset was already of the age and in the condition expected at the end of its useful life. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period.

LEASE

The company leases the headquarter. The right to use the asset is presented together with property plant and equipment in the separate statement of financial position. Assets arising from a lease are initially measured on a present value basis. Right-of-use assets are measured at cost comprising the following:

- the amount of the initial measurement of lease liability,
- any lease payments made at or before the commencement date less any lease incentives received,
- any initial direct costs, and
- costs to restore the asset to the conditions required by lease agreements.

Right-of-use assets are generally depreciated over the shorter of the asset's useful life and the lease term on a straight-line basis.

INVESTMENT PROPERTY

Investment property is property held by the Company to earn rental income or for capital appreciation, or both and which is not occupied by the Company. Investment property is initially recognised at cost, including transaction costs, and subsequently remeasured at fair value updated to reflect market conditions at the end of the reporting period.

Fair value of investment property is the price that would be received from sale of the asset in an orderly transaction, without deduction of any transaction costs. The best evidence of fair value is given by current prices in an active market for similar property in the same location and condition. Market value of the Company's investment property is determined based on reports of independent appraisers, who hold a recognised and relevant professional qualification and who have recent experience in valuation of property of similar location and category. Earned rental income is recorded in the separate statement of comprehensive income within net other income. Gains and losses resulting from changes in the fair value of investment property is recorded in the separate statement of comprehensive income within gain on investment property revaluation.

INTANGIBLE ASSETS

Separately acquired intangible assets are measured at cost upon initial recognition. After initial recognition, an intangible asset is carried at cost less than any accumulated amortization and accumulated impairment losses. Intangible assets are amortized using the straight-line method over their useful lives and are assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and amortization method for an intangible asset with a finite useful life is reviewed at least at the end of each accounting period. A change in the expected useful life or the expected absorption of future economic benefits from an asset is accounted for by changing the depreciation period or method accordingly and is treated as a change in accounting estimates. The amortization expense of finite-lived intangible assets is recognised in profit or loss in the appropriate expense category of the intangible asset functions.

IMPAIRMENT OF NON-FINANCIAL ASSETS

In each reporting period, property, plant and equipment and intangible assets are reviewed to determine whether there is any indication that these assets have suffered an impairment loss. If there is an indication of possible impairment, the recoverable amount of any such asset (or group of related assets) is assessed and compared with its carrying amount, if the estimated recoverable amount is lower, the carrying amount is reduced to its estimated recoverable amount, and the impairment loss is recognized immediately in profit or loss. If an impairment loss is indicated for a non-financial asset, the carrying amount of the asset (or group of related assets) is increased to the adjusted estimate of its recoverable amount, but not more than the amount that would have been determined for the asset (or group of related assets) that did not have an impairment loss in previous years. A reversal of a previously recognized impairment loss will be recognized immediately in profit or loss.

FINANCIAL INSTRUMENTS

All purchases or sales of financial assets shall be recognised as applicable, using trade date accounting or settlement date accounting, ie the date on which the company undertakes to purchase the asset or liability. Purchase or sale in the normal course of business means such purchase or sale of financial assets and liabilities, which requires the transfer of assets and liabilities in the period determined by the legislation in general practice in the market. The company classifies financial assets with one of the following based on the business model of instrument management and contractual conditions: amortized value; Fair value in other comprehensive income; Fair value through profit or loss.

The business model reflects how the Company manages the assets in order to generate cash flows – whether the Company's objective is: (i) solely to collect the contractual cash flows from the assets ("hold to collect contractual cash flows"), or (ii) to collect both the contractual cash flows and the cash flows arising from the sale of assets ("hold to collect contractual cash flows and sell") or, if neither of (i) and (ii) is applicable, the financial assets are classified as part of "other" business model and measured at FVTPL.

Business model is determined for a Company of assets (on a portfolio level) based on all relevant evidence about the activities that the Company undertakes to achieve the objective set out for the portfolio available at the date of the assessment. Factors considered by the Company in determining the business model include the purpose and composition of a portfolio, past experience on how the cash flows for the respective assets were collected, how risks are assessed and managed, how the assets' performance is assessed and how managers are compensated.

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

Amortised cost ("AC") is the amount at which the financial instrument was recognised at initial recognition less any principal repayments, plus accrued interest, and for financial assets less any allowance for expected credit losses ("ECL"). Accrued interest includes amortisation of transaction costs deferred at initial recognition and of any premium or discount to the maturity amount using the effective interest method. Accrued interest income and accrued interest expense, including both accrued coupon and amortised discount or premium (including fees deferred at origination, if any), are not presented separately and are included in the carrying values of the related items in the statement of financial position.

The effective interest method is a method of allocating interest income or interest expense over the relevant period, so as to achieve a constant periodic rate of interest (effective interest rate) on the carrying amount. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts (excluding future credit losses) through the expected life of the financial instrument or a shorter period, if appropriate, to the gross carrying amount of the financial instrument. The effective interest rate discounts cash flows of variable interest instruments to the next interest repricing date, except for the premium or discount which reflects the credit spread over the floating rate specified in the instrument, or other variables that are not reset to market rates. Such premiums or discounts are amortised over the whole expected life of the instrument. The present value calculation includes all fees paid or received between parties to the contract that are an integral part of the effective interest rate. For assets that are purchased or originated credit impaired ("POCI") at initial recognition, the effective interest rate is adjusted for credit risk, i.e. it is calculated based on the expected cash flows on initial recognition instead of contractual payments.

All purchases and sales of financial assets that require delivery within the time frame established by regulation or market convention ("regular way" purchases and sales) are recorded at trade date, which is the date on which the Company commits to deliver a financial asset. All other purchases are recognised when the entity becomes a party to the contractual provisions of the instrument.

The company's management has assessed which business model is appropriate for the company's financial assets and classified all assets into the following categories: "financial assets that are measured at amortized cost" (Trade and other receivables, loans issued, cash and cash equivalents, customer cash and cash equivalents) and "financial assets that are measured at fair value, (investments in equity instruments).

Financial assets – reclassification

Financial instruments are reclassified only when the business model for managing the portfolio as a whole changes. The reclassification has a prospective effect and takes place from the beginning of the first reporting period that follows after the change in the business model. The entity did not change its business model during the current and comparative period and did not make any reclassifications.

Financial assets impairment – credit loss allowance for ECL.

The Company measures ECL and recognises net impairment losses on financial and contract assets at each reporting date. The measurement of ECL reflects: (i) an unbiased and probability weighted amount that is determined by evaluating a range of possible outcomes, (ii) time value of money and (iii) all reasonable and supportable information that is available without undue cost and effort at the end of each reporting period about past events, current conditions and forecasts of future conditions.

Trade and other receivables and loans issued are presented in statement of financial position net of the allowance for ECL. For loan commitments and financial guarantees, separate provision for ECL is recognised as a liability in the statement of financial position.

The Company applies simplified approach for impairment of trade and lease receivable. For issued loans the Company applies a three-stage model for impairment, based on changes in credit quality since initial recognition. A financial instrument that is not credit-impaired on initial recognition is classified in Stage 1. Financial assets in Stage 1 have their ECL measured at an amount equal to the portion of lifetime ECL that results from default events possible within the next 12 months or until contractual maturity, if shorter ("12 Months ECL"). If the Company identifies a significant increase in credit risk ("SICR") since initial recognition, the asset is transferred to Stage 2 and its ECL is measured based on ECL on a lifetime basis, that is, up until contractual maturity but considering expected prepayments, if any ("Lifetime ECL"). If the Company determines that a financial asset is credit-impaired, the asset is transferred to Stage 3 and its ECL is measured as a Lifetime ECL.

Financial assets – write-off

Financial assets are written-off, in whole or in part, when the Company exhausted all practical recovery efforts and has concluded that there is no reasonable expectation of recovery. The write-off represents a derecognition event.

The Company may write-off financial assets that are still subject to enforcement activity when the Company seeks to recover amounts that are contractually due, however, there is no reasonable expectation of recovery.

Financial assets – derecognition.

The Company derecognises financial assets when (a) the assets are redeemed or the rights to cash flows from the assets otherwise expire or (b) the Company has transferred the rights to the cash flows from the financial assets or entered into a qualifying pass-through arrangement whilst (i) also transferring substantially all the risks and rewards of ownership of the assets or (ii) neither transferring nor retaining substantially all the risks and rewards of ownership but not retaining control.

Control is retained if the counterparty does not have the practical ability to sell the asset in its entirety to an unrelated third party without needing to impose additional restrictions on the sale.

Financial liabilities

Financial liabilities are recognised at amortized cost or at fair value through profit or loss when they are held for trading, or are derivative instruments, or are classified at fair value.

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

Financial liabilities – measurement categories

Financial liabilities are classified as subsequently measured at AC, except for (i) financial liabilities at FVTPL: this classification is applied to derivatives, financial liabilities held for trading (e.g. short positions in securities), contingent consideration recognised by an acquirer in a business combination and other financial liabilities designated as such at initial recognition and (ii) financial guarantee contracts and loan commitments.

Financial liabilities – derecognition

Financial liabilities are derecognised when they are extinguished (i.e. when the obligation specified in the contract is discharged, cancelled or expires).

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the separate statement of financial position only when there is a legally enforceable right to offset the recognised amounts, and there is an intention to either settle on a net basis, or to realise the asset and settle the liability simultaneously. Such a right of set off (a) must not be contingent on a future event and (b) must be legally enforceable in all of the following circumstances: (i) in the normal course of business, (ii) in the event of default and (iii) in the event of insolvency or bankruptcy.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents consist of cash on hand and money in current accounts with banks, which are subject to a small risk of price changes. Cash and cash equivalents are recorded at amortized cost using the effective interest method. The company depreciates cash and cash equivalents in accordance with IFRS-9.

Cash and other financial instruments of clients in nominal possession

Cash and other financial instruments of clients in nominal possession is credited to the off-balance account.

TRADE AND OTHER RECEIVABLES

Trade and other receivables are recognised initially at fair value and are subsequently carried at AC using the effective interest method.

LOANS ISSUED

Based on the business model and the cash flow characteristics, the Company classifies loans into one of the following measurement categories: (i) AC: loans that are held for collection of contractual cash flows and those cash flows represent SPPI and loans that are not voluntarily designated at FVTPL, and (ii) FVTPL: loans that do not meet the SPPI test or other criteria for AC or FVOCI are measured at FVTPL. Impairment allowances are determined based on the forward-looking ECL models.

INVESTMENTS IN EQUITY SECURITIES

Financial assets that meet the definition of equity from the issuer's perspective, i.e. instruments that do not contain a contractual obligation to pay cash and that evidence a residual interest in the issuer's net assets, are considered as investments in equity securities by the Company. Investments in equity securities are measured at FVTPL, except where the Company elects at initial recognition to irrevocably designate an equity investments at FVOCI. The Company's policy is to designate equity investments as FVOCI when those investments are held for strategic purposes other than solely to generate investment returns. When the FVOCI election is used, fair value gains and losses are recognised in OCI and are not subsequently reclassified to profit or loss, including on disposal. Impairment losses and their reversals, if any, are not measured separately from other changes in fair value. Dividends continue to be recognised in profit or loss when the Company's right to receive payments is established except when they represent a recovery of an investment rather than a return on such investment.

TRADE AND OTHER PAYABLES

Trade payables are accrued when the counterparty performs its obligations under the contract and are recognised initially at fair value and subsequently carried at AC using the effective interest method.

LEASE LIABILITIES

Liabilities arising from a lease are initially measured on a present value basis. Lease liabilities include the net present value of the following lease payments:

- fixed payments (including in-substance fixed payments), less any lease incentives receivable,
- variable lease payment that are based on an index or a rate, initially measured using the index or rate as at the commencement date,
- amounts expected to be payable by the Company under residual value guarantees,
- the exercise price of a purchase option if the Company is reasonably certain to exercise that option, and
- payments of penalties for terminating the lease, if the lease term reflects the Company exercising that option.

The lease payments are discounted using the interest rate implicit in the lease.

Lease payments are allocated between principal and finance costs. The finance costs are charged to profit or loss over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Payments associated with short-term leases of warehouses and are recognised on a straight-line basis as an expense in profit or loss. Short-term leases are leases with a lease term of 12 months or less.

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

SHARE-BASED PAYMENT TRANSACTIONS

Employees of the Company receive share-based remuneration, whereby they render services and receive equity instruments as consideration for the services provided. The cost of share-based payment transactions with employees is recorded at fair value on the date they are received.

SHARE CAPITAL

Ordinary shares are classified as equity. Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction, net of tax, from the proceeds. Any excess of the fair value of consideration received over the par value of shares issued is recorded as share premium in equity.

DIVIDENDS

Dividends are recorded as a liability and deducted from equity in the period in which they are declared and approved. Any dividends declared after the reporting period and before these financial statements are authorised for issue are disclosed in the subsequent events note.

PROVISIONS FOR LIABILITIES AND CHARGES

Provisions for liabilities and charges are non-financial liabilities of uncertain timing or amount. They are accrued when the Company has a present legal or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to the passage of time is recognised as an interest expense. Levies and charges, such as taxes other than income tax or regulatory fees based on information related to a period before the obligation to pay arises, are recognised as liabilities when the obligating event that gives rise to pay a levy occurs, as identified by the legislation that triggers the obligation to pay the levy. If a levy is paid before the obligating event, it is recognised as a prepayment.

CURRENT AND LONG-TERM CLASSIFICATION

In the statement of financial position, the company presented assets and liabilities individually based on current/non-current classification. A company considers an asset as short-term if it: holds the asset primarily for trading purposes; the realization of the value of the asset is assumed or is intended to be its sale or consumption during the normal operating cycle; Realization of the value of the asset is assumed within twelve months after the reporting period; or the asset is cash or cash equivalents unless its exchange or use to settle a liability is restricted for at least twelve months after the reporting period. Other assets are classified as non-current assets.

A liability is considered short-term if: its settlement is expected within the normal operating cycle; It is mainly used for commercial purposes; it must be settled within 12 months after the reporting period; or the enterprise does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting period. Other liabilities are classified as non-current liabilities.

DETERMINING FAIR VALUE

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The best evidence of fair value is the price in an active market. An active market is one in which transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis.

Fair value of financial instruments traded in an active market is measured as the product of the quoted price for the individual asset or liability and the number of instruments held by the entity. This is the case even if a market's normal daily trading volume is not sufficient to absorb the quantity held and placing orders to sell the position in a single transaction might affect the quoted price.

Valuation techniques such as discounted cash flow models or models based on recent arm's length transactions or consideration of financial data of the investees are used to measure fair value of certain financial instruments for which external market pricing information is not available. Fair value measurements are analysed by level in the fair value hierarchy as follows: (i) level one are measurements at quoted prices (unadjusted) in active markets for identical assets or liabilities, (ii) level two measurements are valuations techniques with all material inputs observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices), and (iii) level three measurements are valuations not based on solely observable market data (that is, the measurement requires significant unobservable inputs).

EVENTS AFTER THE REPORTING PERIOD

Subsequent events of the reporting period and events occurring before the date of authorization of the financial statements, which provide additional information about the company's financial position, are reflected in the financial statements. Post-balance sheet events that do not affect the company's financial position at the balance sheet date, but are of material importance, are reflected in the accompanying notes to the financial statements.

JSC GALT AND TAGGART
NOTES TO THE SEPARATE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 31 DECEMBER 2024
(GEORGIAN LARI)

4. SIGNIFICANT ACCOUNTING ESTIMATES AND JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

The Company makes estimates and assumptions that affect the amounts recognised in these separate financial statements and the carrying amounts of assets and liabilities within the next financial year. Estimates and judgements are continually evaluated and are based on Management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Management also makes certain judgements, apart from those involving estimations, in the process of applying the accounting policies. Judgements that have the most significant effect on the amounts recognised in these separate financial statements and estimates that can cause a significant adjustment to the carrying amount of assets and liabilities within the next financial year include:

Determination and valuation process of fair value

Investments in financial instruments are valued at fair value. The inputs used in the fair value determination are unobservable inputs and the valuation was made based on level 3 information in the fair value determination hierarchy. Changes in accounting estimates can cause significant variations in the carrying amounts and items of comprehensive income for the period.

5. NET BROKERAGE FEE AND COMMISSION INCOME

Net brokerage fee and commission for 2024 and 2023 is presented as follows:

	2024	2023
Commission income from trading platform	9,673,730	5,263,953
Brokerage fees	3,284,500	1,658,635
Commission income from Custody services	1,276,928	922,182
Other commission income	433,722	298,354
Total brokerage fee and commission income	14,668,880	8,143,124
Brokerage commission expense	(5,129,831)	(3,759,977)
Net brokerage fee and commission income	9,539,049	4,383,147

6. NET INVESTMENT BANKING AND ADVISORY FEES

Net investment banking and advisory fees for 2024 and 2023 is presented as follows

	2024	2023
Commission income from bonds placement	5,047,295	5,932,322
Income from advisory and research	4,531,520	263,367
Income from Investment Banking services	-	26,901,051
Total investment banking and advisory fees	9,578,815	33,096,740
Expenses related to investment banking and advisory	(461,938)	(627,398)
Total other operating income	9,116,877	32,469,342

7. ADMINISTRATIVE EXPENSES

Administrative expenses for 2024 and 2023 is presented as follows:

	2024	2023

16. LOANS ISSUED

Loans issued can be represented as follows:

	31 December 2024	31 December 2023
Long-term loan	-	-
Short-term loan	4,413,373	3,644,377
Credit loss allowance charge in profit or loss	(2,869,960)	(2,221,749)
Total Loans issued	1,543,413	1,422,628

Provisions of Impairment

1 January 2024	2,221,749
Accrual of the year	300,967
Accrual	(49,174)
Foreign exchange loss effect	396,418
31 January 2024	2,869,960

Provisions of Impairment

1 January 2023	1,714,827
Accrual of the year	506,922
31 December 2023	2,221,749

On June 20, 2019, the Company signed mezzanine loan agreement with other entity and according to the agreement issued first tranche of USD 150,000.

Additionally, according to the agreement signed in 2020 year, the company issued 700,000 USD. Annual interest rate of the loan is 18% and accrued interest should be fully paid at the end of year 5 starting from the date of the first tranche.

The main operating activity of the borrower is to breed rabbits and sell them as meat products. In December 2021, JSC Galt & Taggart, in the face of decrease of the borrower's financial performance and increased mortality of rabbits, decided to impair the loan at the market value of collateral, based on Cushman & Wakefield's assessment.

17. PREPAYMENTS

	31 December 2024			31 December 2023		
	Long-term	Short-term	Total	Long-term	Short-term	Total
Prepaid share bonus	1,181,119	48,266	1,229,385	191,656	562,639	754,295
Prepaid salaries	-	-	-	-	9,000	9,000
Other prepayments	-	27,694	27,694	-	34,167	34,167
Total prepayments	1,181,119	75,960	1,275,079	191,656	605,806	797,462

Prepayments mainly consist of BOGG (continuation of BGEO) shares, which are transferred to employees, according to the terms. At the moment of granting the bonus, the company recognizes the obligation to the employee and records it as a prepaid bonus, recognized as an expense proportionally, over a specified period.

18. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

Key management compensation	1,632,538	1,241,099

25. CONTINGENT ASSETS AND LIABILITIES

The company does not have any significant contingent assets and liabilities.

26. FINANCIAL RISK MANAGEMENT

In performing its operating, investing and financing activities, the Company is exposed to the following financial risks:

Credit risk: the possibility that a debtor will not repay all or a portion of a loan or will not repay in a timely manner and therefore will cause a loss to the Company.

Liquidity risk: the risk that the Company may not have, or may not be able to raise, cash funds when needed and therefore encounter difficulty in meeting obligations associated with financial liabilities.

Market risk: the risk that the value of a financial instrument will fluctuate in terms of fair value or future cash flows as a result of a fluctuation in market prices. Basically, the Company is exposed to three market risk components:

- Interest rate risk
- Currency risk
- Equity price risk

The Company's management in cooperation with the Company's operating units carries out risk management. Due to the relative simplicity of the Company's operations, there are no written policies on overall risk management.

The following table summarizes the carrying amount of financial assets and financial liabilities recorded by category:

	December 31, 2024	December 31, 2023
Financial Assets		
Cash and Cash Equivalents	6,453,944	4,642,810
Financial Assets at Fair Value through profit or loss	1,713,358	2,226,180
Loans issued	1,543,413	1,422,628
Accounts Receivable	3,253,490	1,309,518
Total Financial Assets	12,964,205	9,601,136
Financial Liabilities		
Accounts Payable	3,369,481	2,850,490
Total Financial Liabilities	3,369,481	2,850,490

The following table provides an analysis of assets that are measured subsequent to initial recognition at fair value, categorized into Levels 1 to 3 based on the degree to which the fair value is observable:

JSC GALT AND TAGGART

Interest rate risk

The Company's exposure to interest rate risk only concerns financial assets which are fixed rate. The impact of a change in interest rates on fixed interest rate financial assets on their fair value was assessed to be insignificant.

Foreign currency risk Foreign currency denominated assets (bank balances, deposits, securities and receivables) and liabilities (payables) give rise to foreign exchange exposure. The Company does not have any formal procedures on managing currency risk, however, management considers themselves to be well informed on the tendencies in the economy and has undertaken several steps to minimize its currency risks. These steps mainly include placing currency deposits and holding financial instruments. Financial Assets by Currency

Financial assets as at 31 December 2024 and 31 December 2023 are analysed by currency as follows:

Financial Assets as of December 31, 2024	GEL	US Dollars	Euros	GB Pounds	Swiss Franc	Other	Total
Cash and cash equivalents	892,258	4,924,361	400,296	153,103	2,411	81,515	6,453,944
Accounts Receivable	480,498	970,562	1,802,431	-	-	-	3,253,490
Loans Issued	-	1,543,413	-	-	-	-	1,543,413
Financial Assets at Fair Value through profit or loss	1,713,358	-	-	-	-	-	1,713,358
